

Virsha Arif

Software Engineer & Flutter Developer

Aspiring Flutter Developer with a strong foundation in cross-platform mobile application development using Flutter and Dart. Experienced in building responsive, user-friendly mobile applications with clean UI/UX and integrating Firebase, REST APIs, Provider, and MVVM architecture. Completed multiple Flutter projects, including e-commerce, live streaming, and social media applications. Passionate about writing clean, scalable code and eager to contribute to innovative teams while continuously enhancing mobile development skills.
